What is MossTile System?

InnoGreen MossTile System is an excellent indoor greening solution for those who want easy care and real plants texture greening decoration. Directly come from Scandinavia, our natural harvest Reindeer Moss is one of the cleanest vegetation on the earth.

Like most of the lichen, Reindeer Moss absorbs moisture in the atmosphere to sustain itself. There is no need to water, prune or trim it, providing a completely maintenance-free choice for busy people like you.

By using 100% natural Reindeer Moss, our detail-minded craftsmen handpick only the best moss before stabilizing and transplanting them into our vertical greening panels. Fluffy and colorful, each of our MossTile has a perfect circle shape.

Advantages

- Maintenance-free
- Variety of color choices and more colors by request
- Easy to install
- Natural product
